

Belinus Laia MD18

D.O.B. 09/01/2004

Belinus is a victim of the 28th March 2005 Nias Island earthquake, when his home was destroyed. He is the fourth of six children. His father and mother cannot read or write - they are very poor and work in the rubber plantation.

He spent most of his formative years at YACAN Children's Home but now lives independently. Belinus is at university (1st year as at December 2023) studying Civil Engineering. He really wants to succeed and wants to be able to build his family a new

home. Unfortunately, costs have increased considerably, therefore, the three sponsors he already has are not enough.

Any monthly amount will really help Belinus.
